## [www.makelainen.com](http://www.makelainen.com) - A NEW FORUM FOR DX'ERS

A new Forum DXers has just been opened at <http://www.makelainen.com/dx>. You can access it also directly at <http://www.makelainen.com/phpBB/index.php>.

I hope that as time goes by, the site will develop into a forum of sharing DX tips, opinions on DXing, QSL news etc, anything related to DXing. Three different forums have been created specifically for FM DXing, and more can be set up if necessary. The discussion takes place in English so that as many as possible, from all around the world, can participate.

The forum is not a direct competitor to various DXers' mailing lists, instead I hope that it will complement them. The bulletin board functions very differently from a mailing list, and contains sophisticated functions to for example form threads in discussion, to get to know other participants and to share information in real time - all this whenever you want, without clogging your email account after a couple of days offline.

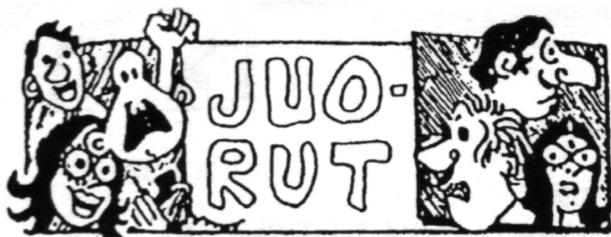

The idea is not to torpedo any other DX resources available on the Internet. On the contrary, I hope that discussion about DX sites will take place and their contents get the attention they deserve also at this Forum. I will also be happy to exchange links with established DX sites on the Forum.

Anyone can browse the Forum, but only registered users can post messages. Guidelines for writing are the same as in any public forum; no offensive language, no personal insults, be careful with copyright issues, appreciate other opinions even if you don't agree - and remember to keep it DX-related. I'm open to your suggestions on how to develop the Forum further. Please take a minute to register, and let me know how you think that the DXing community can better benefit from a forum like this.

## DX NEWS

Here is the current observed schedule of Voice of Indonesia (Suara Indonesia).

All frequencies appear to be via Cimanggis (Jakarta) 250 kW. Some language services seem to disappear occasionally for days or weeks, with transmitters remaining on air with open carrier at the relevant times.

Arabic

0300-0400: 9525, 11785

Chinese (Mandarin)

1030-1130: 9525

English

0100-0200: 9525, 11785

0800-0900: 9525

2000-2100: 15150

French

1900-2000: 15150

German

1800-1900: 15150

Indonesian (Bahasa Indonesia)

0200-0300: 9525, 11785

1200-1300: 9525

Japanese

1130-1200: 9525

Malay (Bahasa Malaysia)

0900-1000: 9525

Spanish

0030-0100: 9525, 11785

1730-1800: 15150

Thai

1000-1030: 9525

(Olle Alm via Cumbre DX)

## QSL INFORMATION

RRI Fak Fak 4789kHz: Partial data letter with \$1 in 86days. V/s Muhammad Sanaki. (Yasuhiro Ishizaki via IDXC No.148)

RRI Merauke 3905kHz: Received via registered mail from Indonesia was my prepared card signed and stamped with all the details filled in. This was in response to a registered f/up report in Indonesian, audio tape, and mint stamps (used) mailed from Hungary for a November 1997 reception. 7,500 rupiah postage was on the envelope. The v/s is illegible. (George Maroti via Cumbre DX No.361)

RRI Serui 4606kHz: Full data prepared card received in 7 weeks for an Indonesian f/up report, audio tape, and mint stamps (used) sent via registered mail from Hungary. This was in response to a March, 2000 reception. There are two v/s on the card. One appears to be Y. Kaisiu, the other is Mika Numberi, Asistem Manajer.

This card was mailed as a postcard, and wasn't enclosed in an envelope. I use 67 pound cover stock for printing my own cards, and surprisingly the card survived the long journey without any damage. (George Maroti-NY via DXplorer)

 \*\*\*\*\*

Hello everyone

I'm happy to announce the introduction of the new Pacific-Asian Log. The PAL is a listing of all known medium wave broadcasting stations in South and East Asia and the Pacific. The log is about 100 pages long and lists over 3300 medium wave stations in 56 countries, from as far west as Afghanistan and as far east as Alaska. It also includes Longwave stations, plus a few weather stations and beacons operating on the edge of the band.

The log contains a wealth of information, including frequencies, callsigns, station slogans/names, networks, locations, power, schedules, languages, formats, SW/MW parallels, and future plans.

It can be downloaded from the following URL:  
<http://www.qsl.net/n7ecj>

There is no cost for the log. The file is about 1 MB in .pdf format. There are two versions, one sorted by frequency and the other by location.

I plan to update the Log on a regular basis, and welcome any additions, changes, and comments. It's by no means 100% complete, but it's certainly very comprehensive.

73 Bruce
