EUROOPPA

585	1.2.	1159	Permskoje GTRK, Perm. Paikallisia mainoksia tähän aikaan. Tämä trendi on näköjään leviämässä. MR
648	27.3.	0430-	DTRK Krim, Oktjabrske. Taisi aloittaa lähetyksensä 0430, ja kuului luonnollisesti varsin hyvällä sinkulla. HAT
648	27.2.	1610	Khersonske Oblastnoje R, Oktjabrske. MR
648	27.3.	0400-0500	R Murski Val, Nemcavi. Signaali oli välillä hyvin nautittava, vaikka BBC ja myöhemmin ukrainalainen häiriköivätkin. HAT
693	31.3.	1605-	DW Moskova. Jäikin pian toisen venäläisen varjoon. Kauempaa idästä ei asemia tarvinnutkaan haaveilla kuulevansa, sen verran inhat kelit olivat mämmin syönnin ohessa. HAT
864	21.3. jne	1600,0358	R Blagojevgrad, Blagojevgrad. Luettelee ison määrän bulgarialaisia asemia ja taajuuksia aloituksensa yhteydessä. HAT
909	22.3.	1600	R Cluj, Cluj. MR
945	2.2.	1240	R Caroline via Riga. Testaili. MR
963	30.3.	2025-	R Tserkov, Moskova. Kuului YLEn kanssa välillä hyvinkin. HAT
981	19.3. jne	1800-	RAI Friuli-Venezia Giulia, Trieste. On edelleen raporttoimatta, mutta kyllä rpt syntyy kun riittävän pitkään jaksaa kytkiä tälläkin taajuudella... HAT
1062	23.2.	0155	Country R, Praha. MR
1071	18.2.	0630-	R Regina Kosice, Presov. Paikallista. LAN5½
1089	1.2.	1125	R Teos, St. Peterburg. MR
1107	29-30.3.	2250,0340	AFN Bavaria, Grafenför. Tuli kuin pyssyn suusta koko yön, mihin kai aseman sloganikin viittaa? Omaa ohjelmaa aamuun saakka //1485. HAT
1143	26.3.	0410-	AFN Heidelberg. Kävin taajuudella ensimmäistä kertaa 10 vuoden tauon jälkeen AFN:n paikallisohjelman aikaan ja heti joutui ideille. HAT
1143	26.3.	0415-	AFN Würzburg. Tuttu jingle-id. Feidasi pari kertaa Heidelbergin alta, joka muuten dominoi taajuutta. Piti raportoida tämänkin, kun ei ole vastannut vanhaan raporttiin 1485:1-ta. HAT

1260	31.3.	1555-	BBC Pietari. Bandin parasta antia, kun ei mitään muutakaan löytynyt. HAT
1314	8.3.	1403	NRK Östlandssendingen, Kvitsöy. MR
1458	21.3. jne	1650,0430	R Constanta. HAT
1457,57	29,31.1.	-1821v*	R Myloserda i Chas, Lviv. Kuului välillä aivan älyttömän puhtaasti. Johtuneeko pääsiäises-tä, kun lopuksi tuli pitkät pätkät katolista rukousta. HAT
1485	29.3.	2255-	AFN Bavaria, Hohenfels/Regensburg. The Big Gun kuului tässä huomattavasti heikommin kuin 1107:llä. HAT
1584	22.3.	1755-	Country R, Brno. Sattui tielle taajuutta tsekates-sä. Jos lähettäisi eri ohjelmaa kuin 1062, joutaisi jopa raportoida mutta tässä tapauksessa ei. HAT
1584	19-20.3.	2121-	R Studio X, Momigno. Discoa ja poppia, yllät-täen myös henksua italiaksi 2130-2200. Pari-na iltana päällimmäisenä. HAR
1602	11.2.	1800	R Egerszeg, Zalaegerszeg. MR
1602	11.2.	1800	RAI Sender Bozen. MR
3903U	16.2.	2300	AFN Keflavik. MR
	3.3.	0600	- Tämä taisi olla jokin virhelähetys, mutta kuului kuitenkin erittäin hyvin. Ta-salta AP Network News. TEJ
7306U	1.2.	0730	R Europa, Pioltello. Erikoisohjelmaa Darion Uu-den-Seelannin vierailun kunniaksi. MR
9800	31.3.	2100	R Varna. Sunnuntaisin. HEP
17299	29.3.	1110-	+ R Omega Polis, Odessa. Lähetti musaa ja mai-noksia USB:llä kun laivaradiopuheluja ei ol-lut. YK

BRITTEIN SAARET

1350	28.3.	2240-	Hemel Hempstead Hospital R, Hemel Hempstead. Käytti pitkää muotoa idissään. HAT
1350	28-31.3.	2210,0300	Kingstown R, Kingstown-upon-Hull. Kuului hyvin juuri ennen auringonnousua. HAT
1350	28.3.	2235-	R Cavell, Oldham. Oli totaalinen altavastaaja, mutta onnistui puristautumaan hetkellisesti

			esille. HAT
1359	12.3.	0500-	Classic Gold 1359, Silton. Antoi säätä Coventryyn. YK
1521	22.3.	0412	Classic Gold Breeze, Reigate. "Classic Gold 15-21 Reigate, East Grinstead and Crwaley". Soitti mm. Moody Bluesia. TEJ
1602	28.1.	0600	BBC R Kent, Rusthall. MR
IBERIA			
1341	29.3.	2335-	OCR Ciudad Real. Tuli yksinään omilla mainoksillaan, valitettavasti Almería pysyy piilossa. Ibsu-kuuntelut menivät muutenkin pääsiäisenä ihan pipariksi. HAT
1575	16.2.	0059	SER R Córdoba, Córdoba. Paikallis-id tähän aikaan. MR

5030	12.3.	1831	R Burkina, Ouagadougou. Idaili "Radio Burkina, Radiodiffusion du Burkina 92 FM" eikä tietokaan englanninkielisistä uutisista. Soitteli tuttuja 70-luvun hittejä. VEH
5100	25.3.	2300	Vo Liberia, Monrovia. (-sai yllättäen presi-

9550	28.3.	2359	dentti Taylorilta luvan palata ääneen, ja näin on tehnytkin. /ed.) HEP Tent. R Okapi, Kinshasa. Taajuudella kuuluva FF-asema on lähes poikkeuksetta Radio Habana Cuba, jota kannattaa siis ehdottomasti varoa! Okapiin taajuudesta on liikkunut erilaisia uutisia, mutta lokattu maaliskuussa nimenomaan tässä. Idit vielä varmistamatta, joten toistaiseksi syytä olla tentatiivinen. HAT
AASIA			
594	17.3.	1355	JOAK NHK-1, Tokyo. MR
738	3.3.	1600	Hunan RGD, Changsha. Odotin taajuuden tavallisen, eli Xinjiangin idiä, eli tämä oli mukava yllätys. MKA
738	12.2.	1310	Tseljabinskaja GTRK, Tseljabinsk. "R Yuzhniy Ural". R Rossiita ennen tätä paikallista ja Majakia sen jälkeen. MR

LEM158 DXpedition Report

December 1-8, 2001

by Mika Mäkeläinen

We spent the week around Finland's Independence day (December 6th) in Lemmenjoki, celebrating our independence of Finnish radio stations. Once again the polar night proved to be the perfect timing, giving us an almost continuous flow of distant radio stations on the mediumwave band. Our best catches this year were from China, but we also enjoyed a pretty stable reception of signals from the East Coast of North America.

[Jim's](#) Honda was jampacked with radio equipment and handed over to the State Railways for overnight transportation from Helsinki to Kolari on Friday, November 30th. After one beer, we were ready for bed, but especially [Mika](#), being so anxious to get to play with the receivers, spent a rather restless night on the train.

We arrived at around 9.30 a.m., but it was still dark. An hour's drive from Kolari, the Levi mountain resort village was the last outpost before wilderness, and that's where we stocked groceries and had the last decent meal - yes, reindeer pizza for Mika - for a week.

Antennae intact

We saw hardly anyone on the road from Levi to Lemmenjoki. Driving in pleasant wintry weather, and without hitting the ubiquitous reindeer herds, we arrived in [Lemmenjoki](#) well before 3 p.m. local time (1300 UTC) on Saturday December 1st, and had the antennae sorted out and most of our gear in place before 1400 UTC.

It had already been 11 days before the departure of the previous DXpeditionists, so finding nearly all permanent antennae functioning well was a positive sign. Our DXpedition was the 6th of this season, and the 158th of all DXpeditions to this location, thus the abbreviation LEM158. Our [antenna and equipment](#) differed only slightly from last year.

The first 24 hours

When we switched our receivers on, not a single Transatlantic station was audible, but there were pretty strong signals from China. Good enough. It was already pitch-dark, and very soon the few Asian AM stations disappeared as Europeans invaded the band at intervals of 9 kHz, but we were too excited to try to get any sleep.

Normally evening activity would concentrate on scanning for random outbreaks of Asians or the much more predictable local breaks of Spanish stations, but as there were hardly any local inserts on Saturday, we caught nothing. Around midnight shortwave stations from Brazil came in exceptionally well, and we identified stations like Rádio Congonhas (4775 kHz) and Rádio Cultura de Campos (4955 kHz). Practically nothing on AM, so it was a quiet night thereafter.

Sunday morning (after 0530 UTC) brought the first coveted sounds from North America; mostly from the East Coast. No sensational catches this morning, but it was a good feeling.

In the afternoon we kept an extremely close watch at Asian stations, and were happy to hear the first stations rise above the noise at 1100 UTC. One of the most welcome catches was DXJR, a new Philippino station on 1575 kHz, occasionally beating even the superpower Thai station, then signing off early. Additionally, pretty rare Chinese local and regional stations were observed on frequencies such as 1584 and 1431 kHz.

China jubilee

LEM158 became our best ever DXpedition in terms of logging new Chinese AM stations. Chinese language was heard virtually every afternoon around 1200-1300 UTC on many frequencies, but Friday December 7th was a field day beyond our wildest expectations. Chinese stations ruled the band from their appearance at 1020 UTC all the way until around 1600 UTC.

We were especially intrigued by the many local dialects heard aside from standard Chinese and Cantonese. Station identifications heard in these strange minority languages (on frequencies such as 1584, 1512 and 1368 kHz) are giving us a hard time, so if you know any sinologists, help on resolving some mystery announcements would be most welcome.

Some of the most fascinating catches identified so far include Haixia zhi Sheng on 666 kHz and Nei Monggol PBS on 1152 kHz. After a semi-local Latvian station had recently vacated the frequency of

1350 kHz, we had a constant watch on this frequency, and were pretty successful in emptying it of Chinese and some other Asian stations as well.

Otherwise Asian signals were relatively weak and few. The conditions didn't favor Japan, the Koreans, the Philippines - and not even Thailand, India or Iran, as often associated with below-average conditions. Despite keeping an eye on the X-band, we didn't hear any AM stations from the general direction of Australia, and not even the usual indicator RRI Jakarta on 999 kHz showed up.

Stuck on the East Coast

After Sino DX, it became our second major effort to find new stations from the East Coast of the U.S. and Canada. Conditions toward North America repeated the same pattern almost every day, with East Coast stations best audible at daybreak around 0700-0900 UTC, and disappearing soon thereafter. A few dominant stations from the Great Lakes region were audible already at nighttime on most nights, but nothing of interest to us.

Geographically, for the first few days, stations were heard almost exclusively East of the Appalachians and from around Lake Erie and Lake Ontario. This narrow scope was very welcome, as it kept many Midwest dominants comfortably at bay. The East Coast came best on Monday, December 3rd, when we were able to identify a number of stations previously unheard by us, such as 790 CFAN, 830 WCRN, 900 CKDH, 1160 WMVI, 1230 WMOU, 1570 WBUG, 1580 WEAM and 1600 WKWF.

Later during the week also Midwest stations became audible, and on Thursday, December 6th, we had our first afternoon opening from the West Coast. KVRJ Blaine WA (1600 kHz), with a rare format of chanting and Indian movie melodies, was logged for the first time in Finland. This station is likely to become one of the dominant stations on the frequency.

The X-band was under special scrutiny, but all stations identified have been heard in Finland already before.

Tame Latin performance

There was no abundance of South nor Central American stations. Nighttime reception was much below average, and a couple of Brazilians on shortwave was just about all worth mentioning.

In the morning hours a few Cubans were identified among East Coast stations, but aside from that, Jim's catch of WRSJ Bayamon PR (1560 kHz) and Mika's catch of Radio Tricolor, Guayaquil (1250 kHz), both on Friday, December 7th, were among the few highlights.

Midwinter in Finland is unique, because it offers the once-in-a-year chance to hear Latin American stations on shortwave as they begin their broadcast day. Taking advantage of this, we managed to pick up Radio Imperio, Chiclayo (4389 kHz), Radio Buenas Nuevas, San Sebastián (4799.8 kHz) and Radio Casino, Limón (5953.9 kHz).

Euroclerosis

The closest European equivalents to graveyard channels are the frequencies of 1602, 1584 and 1485 kHz. Unfortunately, as usually is the case in Lapland, 1602 kHz was completely destroyed by Radio Egerszeg's poor modulation and 1584 kHz was dominated by Iran, so no new catches this time.

Mika scored the remaining local Belgian stations, but otherwise we didn't get much anything from Europe. It was disappointing that GTRK Mordoviya, Saransk, had moved from 1062 kHz to 1080 kHz, destroying a channel which used to be very good for Asian DXing.

We kept a close watch on Spanish local breaks, but as usually, reception conditions favored the northwestern corner of the country, meaning a meager haul of new stations.

Stable conditions

Solar activity was very stable the entire week, so it didn't come as a surprise that African AM stations didn't show up. Solar flux started at 226, hit a high of 245 on Monday, December 3rd and returned back to 226 by the end of the week. A-index varied in the range of 3-10, solar activity was low to moderate and the geomagnetic field was quiet to unsettled every day. Beautiful northern lights (aurora borealis) were visible on one evening.

Weatherwise it was a pretty normal week in Lemmenjoki. Temperatures varied from -2 to -20 degrees Celsius, so wandering in the forest checking the antennae wasn't an overly arduous undertaking.

Happy but tired - after an average dose of five hours of sleep per night - we packed our gear after midday local time on Saturday, December 8th. Our successors, Per-Ole Stenman and Mikael Dalkarl, arrived before our departure, and we had time to share our experiences of the past week. U.S. stations were audible pretty well when we had to leave, so prospects were better than a week before. Initial results from the LEM159 DXpedition indicate that they were able to hear many of the same stations as we.

All in all, the results were average, if compared to all the DXpeditions we have had in Lapland, but above average if compared to other DXpeditions of this past fall. For details on our identified stations, here's the [LEM158 DXpedition log](#). For some logging guidelines, check out [notes](#) on the log. Be sure to check the log again in the future, since many more stations are added all the time as we get to review our recordings. Mika alone has over 150 hours of audio to check, so the post-game show of this DXpedition will last well into the spring! Jim's recording strategy was much more conservative, because he is heading back to Lemmenjoki already in February 2002.

1350	30.01.	<u>2225-</u>	<u>Kunming PBS, Kunming</u> .
1539	27.01.	1200	<u>CPBS</u> . A new China National Radio transmitter on the band again. Perhaps from the Western parts of China, as the only other station audible was Xinjiang PBS on 1593. Timo Reiniluoto heard this a few weeks earlier.
1593	27.01.	2235	<u>R Thailand Ratchaburi</u> . One of the very few Radio Thailand stations broadcasting local programme on AM anymore. The others are Mahasarakham 531, Kanchanaburi 558, Sisaket 864, Chiang Mai 1476 and Trat 1557. "Sathaani Witthayu ... Ratchaburi AM stereo 1593 (nyngpan haaroi kausip saam) kilohertz ..."
6075	31.01.	1130 +	<u>Yushu PBS, Yushu Xian</u> (tentative). Own programme until 1134, then CNR relay, but own brief closing announcements at 1230. Also heard the next day, but then with heavy interference by Deutsche Welle.
7315	02.02.	<u>0827-</u>	R Nederland, Petropavlovsk-Kamchatsky. Special live coverage of the wedding of Crown Prince Willem-Alexander and Maxima Zorreguieta.

3305	30.01.	-1303	R Western, Daru closing down.
3315	30.01.	1250	R Manus, Lorengau (tentative). Was only relaying Karai National Radio and continuing way after 13 UTC. This is a new phenomena, never before have I heard night relays on local PNG stations.

NORTH AMERICA

820	01.02.	0630	<u>WNYC New York, NY</u> . Relaying BBC World Service, but giving own announcements at half hour and on the hour. Occasionally even stronger than the dominant country station CHUM. Heard once before in Finland, in December 2001 by MD.
1430	30.01.	0754	<u>WXKS Everett, MA</u> . "More songs to make you feel good on AM 1430 WXKS."
1550	27.01.	0740	<u>KLFJ Springfield, MO</u> . Very strong, so must have used their daytime power.
1630	02.02.	0635	KKWY Cheyenne, WY. "KWY", great country music.
1640	02.02.	0630	KBJA Sandy, UT. Local commercials in Radio Unica programme.
