Eurooppa

963	16.10.	1500-	POL: Twoje Radio Lipsko, Lipsko. Pitkästä aikaa uusi euro! Tasalta idi ja jingle 'Twoje Radio Lipsko'. Hävisi pian Bulgarian alle. JMS
1278	2.10.	1500-	BLR: R Brest. Tunnusmelodian jälkeen 'Govorit Radio Brest' ja uutisia sekä mainoksia mahtavalla sinkulla. Tämä oli yllätys. Eipä ole aikaisemmin tullut tätä kokeiltuakaan. Nyt satuin vain olemaan oikeaan aikaan taajuudella. PUL/R
1602	30.9.	0724-	HOL: R Waddensee. Aika heikosti tuli. KTU

Brittein saaret

963	11.10.	0404-	G: Asian Sound R. Uutisten päätteeksi hyvät idit, alla Club Asia. JMV
1386	14.10.	0413-	G: Carillon R, Loughborough. Tämä se jaksaa kuulua pienestä tehostaan huolimatta. Nyt ekaa kertaa oikein idin kanssa uudessa QTH:ssani Kouvolassa. TAT

Iberia

4394.5	13.10.	1943-	E: Onda Cero, Madrid via unid ute-station. USB. Selosti Espanja-Tanska ottelua. En saanut lokaali-idiä, mutta Mauricio Molanon mukaan releoi Onda Cero Madridia jaksolta 954. JSA
--------	--------	-------	---

Afrikka

4828	4.10.	1710-	ZWE: Voice of Zimbabwe, Gweru. Tähän aikaan tulee EE puheohjelmaa, myöhemmin taas non-stop musaa. JSA
5970	30.9.	1830-	ETH: R Fana, Addis Ababa. Uusi taajuus //6110//7210 eli kolme lähetintä. JSA
5980	27.9.	1700-	ETH: VO Tigray Revolution, Mekele. Siirtynyt jaksolta 5970 tähän. //6185. JSA
7175	2.10.	1600-1700	ERI: VOBME, Asmara. Etiopian jammeri häiritsee 16-17. VOBME pomppi välillä taajuudelle 7160 karkuun. VOBME:n toinen lähetin näyttää jälleen olevan jaksolla 7090. JSA

Aasia

567	11.10.	1430-	J: NHK1. Useat alabandin NHK:t olivat kuuluvissa, mikä on etelärannikolla harvinaista, mm. 594,693,747, 774 (hyvin) 828. Samalla myös kaupalliset aika kivasti. Keliä siis oli, vaikka pientä häiriöisyyttä pukkaakin perjantaina - tosin korona-aukko ei ole enää niin paha kuin aiemmin uumoiltiin... TK
648	28.9.	-1740	IND: AIR Indore. OLE8
729	15.10.	1422-	CHN: Jiangxi RGD. Öh, traditionaalista kiinalais-musiikkia, johon on sovitettu taakse teknojumppu. MAA41

774 801	15.10. 14.10.	1550- 1355-	IND: AIR Shimla. ..ja soundit muhkeat, siis lujaa. JMV CHN: Zhujiang EBS, Maoming. Ajoittain järjestyttävä kuuluvuus. Kiinalaiset tulevat raudanlujilla signaaleilla, mutta eivät kumma kyllä yhtä pitkään kuin esim. japanilaiset. MAA41
864 891	15.10. 4.10.	1458- 2050-	CHN: Anhui EBS, Hefei. MAA41 TUR: TRT4. Aasialaiset vahvoilla tänä yönä /954 khz. IRA
909 954	16.10. 12.10.	1530- 1440-	CHN: Tianjin News Channel. MAA41 J: JOKR Tokyo. Japsikeli tuntui jatkuvan, kun kävin mökin pakasteesta hakemassa mansikoita kotimatalla töistä. Mongoli- tai kasakkikieli peittosi välillä, lieneekö se Hulun Buir (Hullu Buuro). Kovasti japsia, mutta nyt kelin vähän kääntyessä myös mm. AIR-asemia. TK
1008 1134	13.10. 15.10.	1413- 2016-	J: JONR ABC Osaka. Mainosbreikki. MAA41 KOR: KBS Hwaseong. Ei inahdustakaan ZRGD:stä. Racalin mittari näytti vaatimattomat 70 dBuV, mitä voisi kutsua riittäväksi signaaliksi. MAA41
1161	13.10.	1500-	CHN: Wuxi PBS, Wuxi. Oli tarttunut dominanttina levyille tämäkin. "Tuntui" kuin filippiino olisi alla, mutta... TK
1170	15.10.	1600-	PHL: VOA Poro. Legendaarinen qth, joka tuo ihan vanhat Kumpulan ajat (tredxk) mieleen. JMV
1179	13.10.	1430-	J: JOOR Osaka. Tämä on etelässä yleensä Ruotsin vuoksi vaikea, mutta ainakin tänään SR aloitti 1444, lieneekö normaali s/on-aika? Myös kinuski taajuudella. Kivoja japsitaajuuksia auki, mm 1260, 1269 - mutta ANN:ia... TK
1233	8.10.	1729-	J: JOUR NBC Nagasaki Hosono, Nagasaki. Japsien kuuluvuus parani, kun sain vihdoinkin BOGIN kynnöspellolle. "NBC" kuulutuksia joten pitää olla tämä. Ohjelmaputki tuntui ANN:ltä, muttei ainakaan //1242. Tuo 1242 muuten luettelee mm 18 utc ANN-asemat melko seikkaperäisesti. HighLat keli parani kuten ennustettu ja aamulla olikin bandi NA-sinkkujen vallassa. TK
1242	15.10.	1330-2041	J: JOLF Nippon Hosono, Tokyo. 15. päivä otti ja oli kuultavissa seitsemän tuntia, välillä tietysti kokonaan pois feidaten ja vahvempien alle jääden, mutta kuitenkin. MAA41
1278	16.10.	1315-	J: JOFR RKB Mainichi Hosono, Fukuoka. ANNia ja omia mainoksia. Tutut J-popin klassikot, joita tarjosivat Megumi Asaoka ja Anzen Chitai, ilahduttivat kuuntelijaa. MAA41
1314	13.10.	1455-1510	PHL: Tentative: DWXI Delta BS, Metro Manila. Tuli parina päivänä peräkkäin (13-14.10.), mutta ei taida idiä löytyä. Tyypillistä, ehkä uskonnollisävytteistä talk-px, jossa tagalogin välissä englanninkielisiä huudahtuksia. Melkoista asemamylläkkää tässäkin Aasian suunnasta. TK
1332	13.10.	1356-	J: JOSF Tokai R, Nagoya. Paikallisedit ja mainokset All Night Nipponin väliin. MAA41
1350 1386	13.10. 14.10. 14.10.	1330- 1559- 1609-1700	J: JOER RCC Hiroshima. MAA41 CHN: Tianjin RGD. MAA41 - Tuli paikoitellen todella lujaa, muitakin kinuskeja bandillä. IRA
1413	15.10.	-2101	J: JOIF KBC Fukuoka. Laitetaanpa lokiin tällainen

			myöhäisempi kuulumisaika. Kuului kaukoitakuuntelun viimeisenä asemana. 7 minuuttia myöhemmin alkoikin vuorostaan jenkki kuuntelu KNR:llä. QTH siis Maakeski Päijät-Hämeessä. MAA41
1557	14.10.	1530-	TWN: WYFR Kouhu. K9AY:n syöttö toisinpäin ja itä tulee paremmin - tämä jopa lujaa. Kinuskejakin tuli runsaasti, mutta meni harjoitteluksi. JMV
1566	13.10.	2059-	KOR: HLAZ Cheju. HLAZ idaa joka ilta tähän aikaan jinglaten. MAA41
2960	6.10.	-1509	INS: Tentative: RPDT2 Manggarai, Ruteng. Kovat inssisinkut mm. 3266.4, 3325, 3345, 3987 ja 3995 laittoivat kokeilemaan myös tätä jaksoa. Lagu-lagua ja kuulutus ennen lopetusta, mutta ei jaksanut nousta niin ylös, että idistä olisi saanut tolkkua. Taajuus oli hiukan tasan alapuolella. JSA
3325	1.10.	1530-1610	INS: RRI Palangkaraya. Lopettaa nykyään ilm. Ramadanin vuoksi vähän myöhemmin. Kuuluu usein ja välillä voimalla. "Programa Satu". TK
3325	4.10.	1530-	INS: Tentative: RRI Palangkaraya. Tuli lujaa samaan aikaan kun 120mb Aussitkin, nauha vielä penkomatta mutta RRI:ltä kuulosti. IRA
4750	4.10.	1450-	BGD: R Bangladesh, Betar. Tuli aikamoisella voimalla. IRA

Oseania

1638	13.10.	1530-	AUS: 3ME Radio Lebanon, Melbourne/Sydney. Arabiaa, josta ei id:tä herunut, mutta varmistui, kun kuuntelin aseman nettiradiota seuraavana päivänä, jolloin myös kuului, mutta heikommin. Sama ohjelma, netissä vain n. 1.5 min. viiveellä. Tasalta BBC:n uutiset. PEH
2310	4.10.	1500-	AUS: ABC Alice Springs. Logataan nyt kun tuli näin aikaisin. /2325/2485. IRA
4755.25	3.10.	1200-2000	FSM: PMA The Cross Radio Station. Ehti vastatakin jo email-raporttiin. Ehdinköhän kuulla tämän jopa ennen Lapin kävijöitä? Taajuus oli 4755,25 kHz. MR
	4.10.	1250-	- Tästä tulikin kertalaakilla 60 MB:n parhaiten kuuluva oseaani. Aluksi heikosti saarnaa (Hour Of Decision), sitten sikäläisen keskiiön jälkeen non-stop mx – luultavasti gospel -sellaista. Klo 1400 jälkeen kuuluvuus parani sen verran, että pari IDiäkin sai purkitettua. 'You are listening to The Cross Radio 88.5. The time now: 2 o'clock'. Eli releoi FM -lähetettään. Tällä kuuluvuudella mustunee nopeasti - tai mistä sen koskaan tietää ... PUL/R
	8.10.	1600-1930	- Kuuluihan se, kun pääsi mökki-qthssa kokeilemaan. Kaupungissa meinaa jäädä kohinaan, vinku kuuluu ja näkyy. Illalla pääosin musiikkia ja idi ainakin tasalta, 19 utc jälkeen tutkiskeli Raamattua. Tämäkin luettavimmin 300 metrin BOGilla (@40 ast.) - vaikka se vaimentaa jo näillä taajuuksilla, on sinkku aivan häiriötön ja S0 - 1:lläkin luettavissa. TK
	13.-16.10.		- Ilmoitamme kunnioittavasti että ei signaalin ujettakaan mihinkään vuorokaudenaikaan. MAA41

7325 13.10. 1230-1255 PNG: Wantok Radio Light, Port Moresby. Tässä uudella taajuudella kunnes joku aasialainen alkaa roiskia taajuudelta 7330. JP

Pohjois-Amerikka

590 13.10. 0450- CAN: VOXM St John's NF. myös //740. Täällä lounaisrannikolla vielä odotellaan kelinousua, tänä aamuna painottunut alabandille ja seassa enemmän lattareita kuin NA:ta. JMV

13.10. 2110- - Tällekin on tehnyt minimi hyvää. Takavuosina VOXM tuli "aina" ja joka kerta kurttuiseen huonosti. Nyt on signaalissa potkua ja ohjelmaa jopa kuuntelee. MAA41

650 13.10. 2100- GRL: KNR Qeqertarsuaq. MAA41

830 14.10. 0328- USA: WCCO Minneapolis MN. Koripalloa selostettiin. MAA41

1140 15.10. 0457- USA: WQBA Miami, FL. 'Gracias a nuestros oyentes por su amor y fe, WQBA 1140, La Voz de Miami'. Aamun kelit olivat vahvat 05-06 UTC. WKAT Miami, FL 1360 hyvin 06 UTC. Pääasiassa kuitenkin Kolumbiaa, mm. RN 550, RN 580 ja RN 680, joista viimeisin huikalla signaalilla. Ihmeellisin asema löytyi silti Dommareilta, kun HIJC Radio Emanuel, Santiago 1430 antoi neljän idin ryppään WENE:n ollessa feidauskuopassa. JMS

1200 15.10. 2251- CAN: CFGO Ottawa ON. GO Radio sporttasi National Sports Networkin kanssa. MAA41

1320 16.9. 0325- CAN: CKEC New Glasgow NS. PEK

	13.10.	2116-	- Todellista pelimannimusiikkia, ei rappiokantria vaan aitoa Atlantin rannan skottilais-irlantilaisista menoa. Myöhemmin yöllä taajuus menee tukkoon 00-04, ja muiden kadottua CKEC tulee taas kuuluviin 04 jälkeen. Harmi (?) että on siirtymässä FM:lle. MAA41

1690	9.10.	0401-	CAN: CHTO Toronto, ON. [1690.006]. Soittelee laulelmia ilmeisesti kreikaksi heikolla signaalilla. Onneksi nousi kohinasta sen verran, että ID "CHTO AM 16-90" paljasti aseman oudolla splitillä (taas oli SDR-14 paikallaan). On kai aika uusi testailija tässä. VEH

1060	15.10.	0530-	CUB: CM.. Radio 26, Matanzas. Amanecer on tämän taajuuden dominantti, mutta kuubalainen pääsi työntymään hetkeksi päällimmäiseksi. Tätä taajuutta on jahdattu koko syksy ja vasta nyt tuotti tulosta. JMS
1070	13.9.	0254	CUB: CMKS R Trinchera Antiimperialista. Kuului parin muun lattarin kanssa, muilla taajuuksilla jenkkejä, tässä ei. Liekö tätä ennen kuultukaan tällä taajuudella? HN

1070	16.10.	0130-	PTR: WMIA Radio Arecibo, Arecibo. Selvästi vaisumpi kelipäivä kuin eilinen. Yö oli todella huono ja aamukin jäi varsin vaisuksi. Alabandilla ehkä vähän parempia sinkkuja kuin yläbandilla, mm. Kolumbia 680 taas lujaa sekä Sucre 700 kohtalaisesti. JMS

AFN Würzburg: All US military facilities at Würzburg will be closed in 2008. It was suspected from the start that this will affect AFN Würzburg as well, and I just found an official confirmation. It's the very last item in this document:

http://www.hqusareur.army.mil/news/releases/2007-04-019_FY08_USAREUR-Transformation-English.pdf

I could imagine that the Würzburg transmitters will be turned off when the studios there will close down. Contradictory information circulates about the site of these transmitters, but it appears that at some point the own US forces transmitters at Leighton Barracks were replaced by the Frankenwarte site of T-Systems Media&Broadcast where in late 2003 some obscure tests of 1386 (ex. Megaradio, shut down on in April 2003) with AFN audio took place, especially strange because reportedly it was AFN Bavaria from Vilseck instead of AFN Würzburg, so not just // co-located 1143, cf.

<http://www.worldofradio.com/dxld3217.txt>

It appears that all US military bases served by AFN Würzburg will finally close, including Ansbach-Katterbach where a new FM transmitter for AFN Würzburg on 107.3 had been put on air only in last March, replacing the 107.4 relic at Fürth which until then lingered around with a poor quality feed from Vilseck which had replaced AFN's Nürnberg studios already in 1994:

<http://www.br-online.de/bayern-heute/thema/truppenabzug/standorte.xml>

(Illesheim is not shown here but mentioned in other publications as part of the closure list.) However, apparently this will happen only later, so presumably all remote AFN Würzburg transmitters will for the time being stay on air with other AFN programming, with AFN Bavaria being the natural choice of course. Btw, recently it has been disputed if a 1143 kHz transmitter at Schweinfurth exists at all, arguing that Würzburg and Bamberg would already put a sufficient signal into Schweinfurth, but what I saw so far does not

really confirm this theory. Anyway the Bad Kissingen transmitter is gone (no US forces there anymore), as is the AFN Bavaria transmitter at Regensburg (however, 1485 is still on air at Hohenfels, cf.

<http://subscribe.ru/archive/radio.worlddx/2007/04/10111404.html>)

On the other hand AFN transmitters can stay on air even if no US facilities are left. The Chiemsee hotel has been closed in 2004 and replaced by a new one at Garmisch-Partenkirchen, but surprisingly the AFN transmitter at Prien on 90.3 is still on air. This is a Media&Broadcast facility, so they still pay for it, but who knows if they thoroughly check the bills?

Elsewhere in Germany it appears that the vast majority of the US military facilities in Hessen will close, with Darmstadt and Hanau being due in fiscal year 2008 after Gießen has already been abandoned and 1143 kHz there shut down. Not that anybody would care for the 873 transmitter, but the FM side would be a good field for attempts to strike a deal like a frequency swap with Deutschlandradio (Großer Feldberg 98.7 ./ . Wiesbaden 103.7). Anyway AFN Hessen no longer broadcasts to Baumholder. This really large base, about 40 km northwest of Kaiserslautern, got an own over-the-air AFN service only in January 2006. At this time AFN Hessen went on air via a new transmitter on 106.1 because the Baumholder garrison belonged to the 104th Area Support Group at Hanau. But that's meanwhile a thing of the past, thus 106.1 carries AFN Kaiserslautern now instead.

ITALY

Ciao Rai International:
la fine...

David de Jong writes:

On Sunday, after 72 years, the international shortwave broadcasts of Italy closed down.

Rai International ceased its shortwave broadcasts, and ceased broadcasting in 25 languages.

This news doesn't seem to have had much attention within Italy. Only some specialised websites about (international) radio broadcasts mentioned it, alongside a couple of items in a very few newspapers.

Even Rai International's website didn't mention the end, and on the broadcast itself it was only mentioned on the end of the newscast. In some comments it was mentioned that, from the country where Marconi came from, it is painful to consider that information in languages other than Italian is not available anymore.

As a result of the end of these broadcast, the broadcasts of English, French and German news within Italy during the programme 'Notturmo Italiano' on the mediumwave frequencies of Rai Radio 1 have also ceased. However Rai continues to produce German programming including news, thanks to the special status of the Alto Adige region (Sudtirol) where [Rai Sender Bozen](#), which recently also became available on the Internet, is active.

The Italian language radio programmes of Rai International continue on satellite, Internet and some relays on FM in Canada, Australia and the United States. These broadcasts are mostly relays of Rai Radio 1, Rai Radio 2 and Rai Radio 3. Rai International focuses more on its television activities. Rumours suggest that a Spanish language TV news programme might re-appear.

In parliament Riccardo Pedrizzi, a member of the right wing opposition party Alleanza Nazionale, has asked the government to explain the ceasing of the foreign and shortwave broadcasts. Pedrizzi opposes the end

of shortwave broadcasts and the total end of foreign language radio broadcasts of Rai International. "The decision seems to be in total contradiction to the obligation deriving from the convention which was signed at the end of July," according to Pedrizzi. In this convention, Pedrizzi recalls, it is mentioned that foreign citizens interested or potentially interested in Italy and its values, culture, way of life, creativity and products should be targeted, which in the opinion of the Alleanza Nazionale politician should mean an increase of efforts instead of closing down. Pedrizzi asked the government if it is correct that the current convention between government and Rai/Rai International allows the closing of the broadcasts, and what initiatives the government will take in this matter. According to Pedrizzi this situation is in contradiction with the international role Italy wants to play in the world - Media Network

MOLDOVA- TRANSDNISTER

549 From the beginning of July, the Trans-Dniestrian Moldovan Radio from Tiraspol has expanded its broadcasting time from 1 to 16 hours on the mediumwave frequency of 549 kHz. The transmitter of 150 kW is located in Grigoriopol, and the broadcasting schedule consists of local programmes mainly in the Russian language, a few short programmes during the day in the Romanian and Ukrainian languages, and also consists of the relaying of the Russian radio station "Mayak".

Transmissions are on the air from 05:00 to 21:00. Now, when the Ukrainian network of transmitters of "Radio Promin" does not work on the frequency of 549 kHz, the Trans-Dniestrian Radio is heard in Kyiv even at daytime. But, it will be possible that "Radio Promin" will resume its transmissions on this frequency via transmitters in Mykolaiv, Lviv and Vinnytsia. Moscow area LW/MW --- I've been in Moscow since Monday (24 Sep) and have been surprised to find some of the main local AM transmitters on a reduced schedule, not on the air during the evening. This applies to Radio Yunost on 153 and Mayak on 198 and 549. All three have been heard in the early morning (as early as 0230 GMT) and during the day, but

are off the air during the evenings and late at night. However, Radio Rossii 261 does appear to be on 24/7.

Does anyone know if this is a permanent schedule change, or for some other reason? (Chris Greenway, Sept 26, dxldyg via DX LISTENING DIGEST)

Radio Yunost and Mayak on LW/MW across all Russia (maybe except only some txs) are on the air till 1800 local time.

>From the spring. In Russia the difference between "permanent" and "temporary" is quite vague.

Money, money. Maybe Oct 1 or Nov 1 all will be on the air again. Who knows (Victor Rutkovsky, Russia, dxldyg via DX LISTENING DIGEST)

Hi Victor, Many thanks for the prompt reply. Yes, I noticed them closing down at 1800 Moscow time a short while ago. I must have missed the news of this schedule change last spring. It means that with my receiver (which does not have the old OIRT FM band) I cannot listen to these stations in the evening (Chris Greenway, Russia, ibid.) RUS-DX

INDIA/PAKISTAN:

JAMMING OF TRANSMISSION OF RADIO PAKISTAN LAHORE 630 KHZ BY INDIA FROM 1330-1400

630 kHz Medium Wave, 100 kW, 1330-1400 UT, Radio Pakistan, Lahore Channel 1 broadcasts half hour transmission titled "Punjabi Darbar" in Punjabi language for the Sikhs (a religious minority) in the Indian state of Punjab.

The transmission consists of well researched talks and commentaries primarily aimed at inciting discontentment against the Indian Government. The program has developed wide listenership in rural areas of Indian Punjab .The program team has arranged the programs as per listeners` interest and is quite successful as compared to pathetic standard of programming of other external services of Radio Pakistan.

In view of growing listenership, the Indian Government has initiated jamming of the special broadcast and a transmitter from India starts noise signal at the commencement, i.e. 1330 till 1400 UT at the frequency of 630 kHz. The jamming transmitter muffles the audio at times and the moment transmission of the Punjabi Darbar concludes at 1400 UT, the jamming transmitter also goes off air.
